

SDG INDICATOR 12.7.1. 2020 DATA COLLECTION OUTCOME

Highlights from the federal/national government's report on SDG Indicator 12.7.1

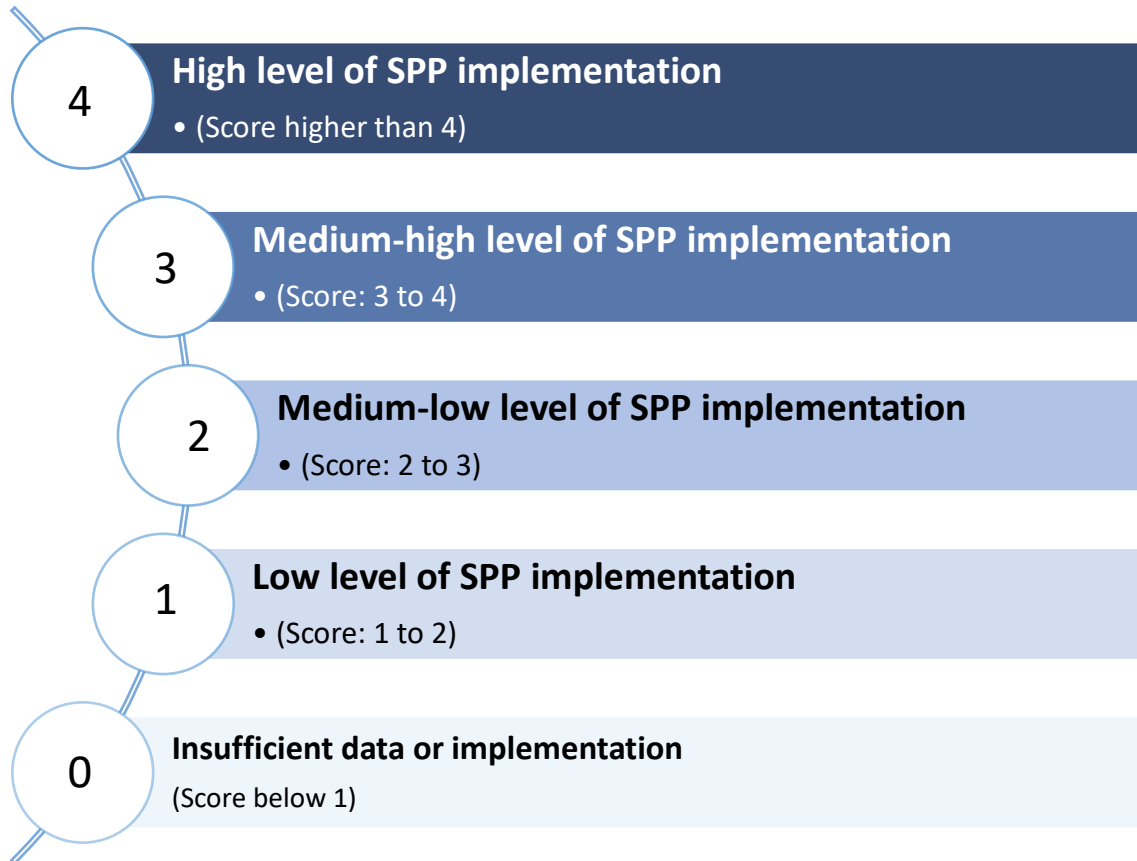

LITHUANIA

I. General information

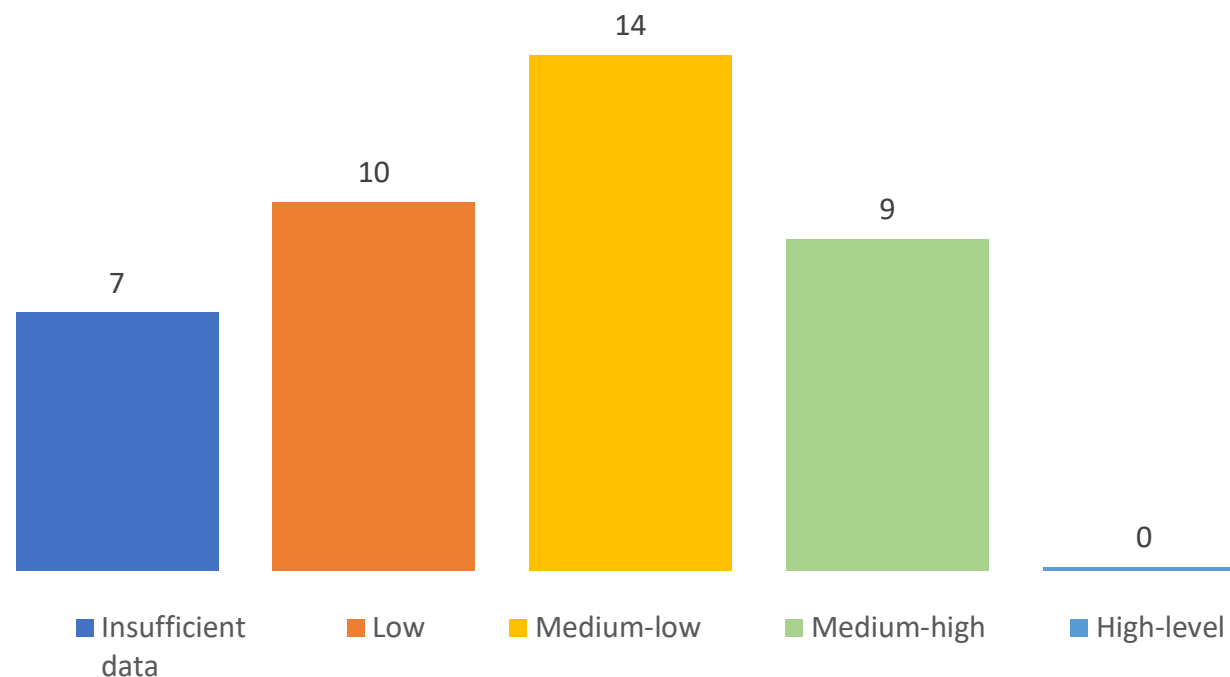

How was the level of SPP implementation assessed?

Maturity model based on calculated SPP Implementation score:

2020 SDG Indicator 12.7.1. Data collection outcome

Distribution of **federal/national government reports** submitted for 2020 data collection (total of 40 reports received) into the 5 set categories:

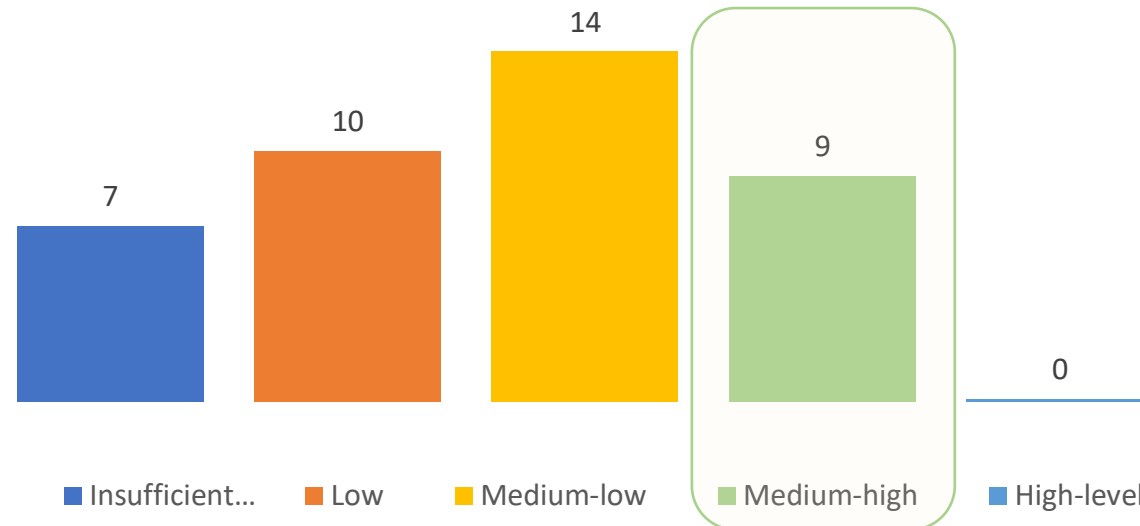

II. Highlights from the federal/national government report and scorecard

Level of SPP implementation

Based on the information (and evidence* provided) in the report and the defined evaluation system, the overall SPP implementation score is **3.23**.

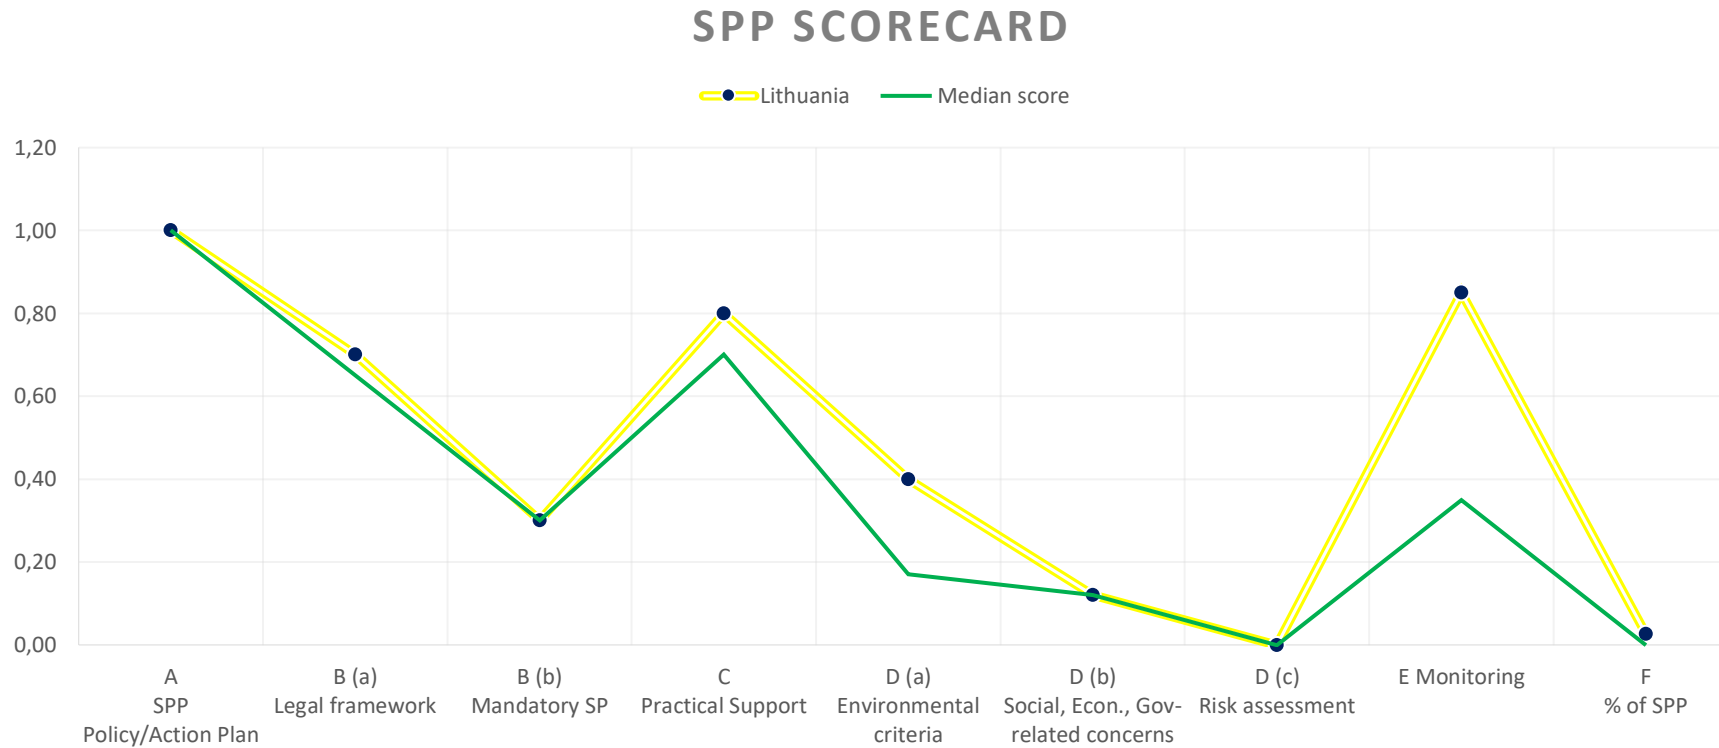

It was therefore rated in **Category 3: Medium-high level of implementation**.

* Please note that in this first collection exercise, some of the answers provided by governments in reports could not be verified due to insufficient evidence and were therefore not accounted for in the final evaluation.

Federal/National Government Scorecard

Detailed SPP Scorecard

[Highlights from the report:](#)

Overall good performance: Lithuania ranks **above median scores in most sections** of the evaluation system.

Federal/National Government Scorecard

Highlights from the report

	Overall SPP Implementation Score	A SPP Policy / Action Plan	B (a) SPP Provisions	B (b) Mandatory/ Voluntary SPP	B. Legal framework	C Practical Support	D (a) Environmental criteria	D (b) Social, Econ., Gov-related concerns	D (c) Risk assessment	D SPP Criteria	E Monitoring	F % of SPP
Lithuania	3,23	1,00	0,70	0,30	1,00	0,80	0,40	0,16	0,00	0,56	0,85	0,03
<i>Max</i>	3,68	1,00	0,70	0,30	1,00	1,00	0,40	0,32	0,20	0,78	1,00	0,40
<i>All governments: Median</i>	2,10	1,00	0,65	0,30	0,80	0,70	0,17	0,12	0,00	0,38	0,35	0,00
<i>Mean</i>	2,04	0,98	0,58	0,18	0,76	0,59	0,19	0,13	0,04	0,36	0,43	0,02

Overall good performance, especially in B: Legal framework, C: Practical support, D(a) Environmental criteria, and E: Monitoring.

The tracking of SPP data and the capacity to provide the actual percentage of SPP are also an encouraging step in the monitoring of SPP implementation, although this share is not yet significant.
